Chain of Custody - Evidence Record

Status: INITIAL COMPUTER-GENERATED RECORD. Further transfers must be recorded when they occur.

Case ID	DFIR-DEMO-003
Evidence item ID	DFIR-DEMO-003-LOG-001
Evidence description	Search-result snapshot from M365 and endpoint telemetry
Source queried	SYNTHETIC TEST INPUT (NOT LIVE EVIDENCE)
Target path	https://contoso.sharepoint.com/sites/Finance/Shared Documents/Drafts/Financial-Report.xlsx
Optional content hash	NOT PROVIDED
Collection time (UTC)	2026-10-20T11:15:52Z
Collector	Demo Examiner
Requesting authenticated principal	LOCAL_DEMO_NOT_AUTHENTICATED
Acquisition method	Log Analytics API query - normalized rows and originating raw telemetry records when returned
Original file seized/acquired	NO
Evidence seal	SHA-256 per content file and separate archive SHA-256 receipt

A. Integrity ledger

evidence/events.csv
SHA-256: 137e47617b8f26df5fac8965147af89f983f677bac5a8be47c495d8e3fc027a1

evidence/events.json
SHA-256: 99ffc81e93a190ddea6504d6e4d38047edf706bcb29f5998d87c97b5c0bc87fb

evidence/query.kql
SHA-256: 04350eb990f87d80355eece5ef10aa5ecff916a27f9f8f63220a94b6d695b3fd

B. Events recorded at preparation

UTC time	Custodian	Action performed	From / To
2026-10-20T11:15:52Z	Demo Examiner	Exported query results; prepared log snapshot	SYNTHETIC TEST INPUT (NOT LIVE EVIDENCE) / preservation process

Archive creation and later transfer to Azure Storage must be independently recorded after successful completion. These future actions have deliberately NOT been pre-signed or represented as completed.

C. Subsequent custody transfers - complete upon occurrence

Date/time (UTC)	Released by	Received by	Purpose / destination	Signatures / receipt

D. Verification and examination

Before analysis or transfer, verify the SHA-256 hashes in manifest.json after extracting the encrypted ZIP. Compare the package ZIP hash against the independently retained storage receipt. Any discrepancy requires escalation and documentation.
